

IMPORTANT - PARKING CHANGES

As a result of constant complaints from our patients relating to people using our car park, but not visiting the surgery, we will be installing an Automatic Number plate Recognition (ANPR) system in the car park on **12th & 13th September 2019** run by a company called parking eye, who work with many NHS organisations.

When you visit the surgery and park on our car park you will be required to enter your registration details into screens located around the building. Failure to do so will result in a parking fine being issued by the company.

Please ensure that you comply with the signage and if you are unsure ask one of the team.
